### Retail Trade Survey Information

Retail sales figures obtained from surveys and GST remittances are a key monthly indicator of consumer purchasing patterns in Canada. Furthermore, retail sales are an important component of the Gross Domestic Product, which measures Canada's production, and are part of many economic models used by public and private agencies. The Bank of Canada relies partly on monthly retail sales estimates when making decisions that influence interest rates. Businesses use retail sales estimates to track their own performance against industry averages and to prepare investment strategies.

Annual Estimates, 1994 to 2009

During the past 16 years, annual retail sales in the Yukon have ranged from a low of \$222,414,000 in 1994 to a high of \$530,028,000 in 2008. The largest percentage increase in sales over the previous year occurred in 1996 when sales were up 17.4% over sales in 1995. The only decreases in sales occurred in 2004 and 2009, when sales fell by 1.8% and 1.9% respectively compared to the prior year.

Retail sales in the Yukon in general have increased each year since 1994 with exception of the slight decreases in 2004 and 2009.
